

EARLY CHILDHOOD EDUCATION

Certificate

Quincy College | Academic Division of Professional Programs

Program Description

Increasingly, American families find the need for safe, certified childcare for children. Essential to the success of any childcare operation is the availability of qualified professionals. The Quincy College program in Early Childhood Education is designed to assist students in meeting the requirements of the Department of Early Education and Care (EEC) and the needs of employers. Students receive a broad-based exposure to Early Childhood Education and prepare students to be teacher, and lead teacher, certified through EEC.

Program Outcomes

At the completion of this program, the student will be able to:

- Describe young children's diverse characteristics and their educational and holistic needs, from birth through age eight.
- Evaluate the goals, benefits, and uses of assessment and use systematic observation, documentation, and other effective assessment strategies to positively influence the development of all children.
- Design, implement, and evaluate developmentally appropriate curriculum that positively influence each child's development and learning, taking into account age, temperament, characteristics, and culture.
- Use social, economic, and cultural issues facing schools and families to create respectful, reciprocal relationships with families and communities.
- Integrate knowledge from a variety of sources including ethical guidelines and professional standards toward becoming reflective, life-long learners within the educational community.
- Apply respectful approaches to provide young children with skills to self-direct/self-regulate and to resolve conflicts/challenges.
